

Key to Geologic Units

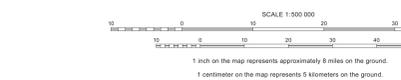

Unconsolidated Sediments			
Qd	Pleistocene dune sand	Qf	Pleistocene outburst-flood deposits
Qa	Quaternary alluvium	Qgs	Pleistocene continental glacial drift
Qts	Quaternary mass-wasting deposits	Qad	Pleistocene alpine glacial drift
Ql	Quaternary loess		
Sedimentary Rocks and Deposits			
QTC	Quaternary-Tertiary continental sedimentary rocks and deposits	Tn	Tertiary nearshore sedimentary rocks
To	Tertiary continental sedimentary rocks	Men	Mesozoic nearshore sedimentary rocks
Mc	Mesozoic continental sedimentary rocks	Tm	Tertiary marine sedimentary rocks
		Mm	Mesozoic marine sedimentary rocks
Volcanic Rocks and Deposits			
Qv	Quaternary volcanic rocks	Tvc	Tertiary volcanic rocks, Crescent Formation
QTV	Quaternary-Tertiary volcanic rocks	Mv	Mesozoic volcanic rocks
Tvg	Tertiary volcanic rocks, Columbia River Basalt Group	Qvt	Quaternary fragmental volcanic rocks and deposits (includes lahar)
Tv	Tertiary volcanic rocks	Tvt	Tertiary fragmental volcanic rocks
Intrusive Rocks			
Qi	Quaternary intrusive rocks	Mi	Mesozoic intrusive rocks
QTI	Quaternary-Tertiary intrusive rocks	Pi	Paleozoic intrusive rocks
Ti	Tertiary intrusive rocks	Pci	Precambrian intrusive rocks
TKi	Tertiary-Cretaceous intrusive rocks	Mfu	Mesozoic-Paleozoic ultramafic rocks
Metasedimentary and Metavolcanic Rocks			
Mms	Mesozoic metasedimentary rocks	MBmt	Mesozoic-Paleozoic metasedimentary and metavolcanic rocks
Pms	Paleozoic metasedimentary rocks	Pmt	Paleozoic metasedimentary and metavolcanic rocks
Ppms	Paleozoic-Precambrian metasedimentary rocks	Mmv	Mesozoic metavolcanic rocks
pPms	Precambrian metasedimentary rocks	Pmv	Paleozoic metavolcanic rocks
Mmt	Mesozoic metasedimentary and metavolcanic rocks	pMv	Precambrian metavolcanic rocks
Metamorphic Rocks (Amphibolite Facies and Higher)			
Mhm	Mesozoic heterogeneous metamorphic rocks	TKgn	Tertiary-Cretaceous gneiss
MBhm	Mesozoic-Paleozoic heterogeneous metamorphic rocks	Mgn	Mesozoic gneiss
pChm	Precambrian heterogeneous metamorphic rocks	Pgn	Paleozoic gneiss
Mam	Mesozoic amphibolite	TKog	Tertiary-Cretaceous orthogneiss
MBam	Mesozoic-Paleozoic amphibolite	Mog	Mesozoic orthogneiss
		Mmi	Mesozoic migmatite and mixed metamorphic and igneous rocks

Other Geologic Units or Features

	Glaciers and ice fields
TZ	Tectonic zones; areas of intense cataclasis, including mylonitization
	Dike swarms: shown where dikes are too numerous to show individually; as to geologic unit
	Eruptive centers: volcanic vents of Quaternary to Miocene age, generally the same age and composition as the surrounding volcanic rocks
	Quaternary to Mesozoic dikes; unlabeled dikes are of Tertiary age

Geologic Symbols

—	Contact	—	Right-lateral strike-slip fault — Arrows show relative movement; short-dashed where inferred, dotted where concealed; arrows omitted in crowded areas
---	Scotch boundary	---	Left-lateral strike-slip fault — Arrows show relative movement; short-dashed where inferred, dotted where concealed; arrows omitted in crowded areas
---	Boundary of modern glacier	---	Low-angle normal fault — Blocks on upper plate; dotted where concealed, queried where uncertain; blocks omitted in crowded areas
---	Fractures (near southwest corner of Spokane County)	---	Dip-slip fault — Bar and ball on downthrown side; long-dashed where approximately located, queried where uncertain; bar and ball omitted in crowded areas
---	Anticline — Showing direction of plunge; dotted where concealed	---	Normal left-lateral strike-slip fault — Arrows show relative horizontal movement; bar and ball on downthrown side; arrows and bar and ball omitted in crowded areas
---	Overturned anticline — Dotted where concealed	---	Normal right-lateral strike-slip fault — Arrows show relative horizontal movement; bar and ball on downthrown side; dotted where concealed; arrows and bar and ball omitted in crowded areas
---	Syncline — Showing direction of plunge; dotted where concealed	---	Thrust fault — Sawtooth on upper plate; long-dashed where approximately located, short-dashed where inferred; dotted where concealed; queried where uncertain; sawtooth omitted in crowded areas
---	Overturned syncline — Dotted where concealed		
---	Monocline, synclinal bend — Dotted where concealed		
---	Monocline, antiform bend — Dotted where concealed		
---	Fault — Long-dashed where approximately located, short-dashed where inferred, dotted where concealed, queried where uncertain		
---	Reverse fault — R on upthrown side		
---	Thrust fault — Sawtooth on upper plate; long-dashed where approximately located, short-dashed where inferred; dotted where concealed; queried where uncertain; sawtooth omitted in crowded areas		

Lambert conformal conic projection
North American Datum of 1983
Base map modified from Washington State Department of Natural Resources, 2000, Major Public Lands of Washington, Washington State Department of Natural Resources, 1 sheet, scale 1:250,000.
Digital data provided by Donald W. Hiller, Engineering Division, Resource Mapping Section.
Digital cartography by J. Eric Schuster and Charles G. Cauffman.
Editing and production by Katherine M. Reed and Joetta M. Roloff.

Sources of Data

This map was compiled from the following sources:
Dunne, J. D., Logan, R. L., Schase, H. W., Wink, T. J., Lindsey, W. S., Jr., Norman, D. K., Genell, W. J., Lapan, T. J., Schuster, J. E., Meyers, R. D., 2002, Geologic Map of Washington—Northern quadrant, Washington Division of Geology and Earth Resources Geologic Map GM-50, 3 sheets, scale 1:250,000, with 72 p. text.
Schuster, J. E., Galati, C. W., Reidel, S. P., Foster, K. R., Zamboni, Stephanie, 1997, Geologic map of Washington—Southern quadrant, Washington Division of Geology and Earth Resources Geologic Map GM-45, 2 sheets, scale 1:250,000, with 20 p. text.
Stoll, R. L., Joseph, N. L., Waggoner, S. Z., Galati, C. W., Kenner, M. A., Burren, B. B., 1991, Geologic map of Washington—Northwest quadrant, Washington Division of Geology and Earth Resources Geologic Map GM-39, 3 sheets, scale 1:250,000, with 39 p. text.
Wink, T. J., Kenner, M. A., Phillips, W. M., Logan, R. L., Schase, H. W., 1987, Geologic map of Washington—Southeast quadrant, Washington Division of Geology and Earth Resources Geologic Map 34, 2 sheets, scale 1:250,000, with 28 p. text.

1:250,000-scale Geologic Quadrant Maps in Washington State
This map was compiled from the 1:250,000-scale geologic quadrant maps shown above, and the reader is directed to those geologic maps for further details; see full references under "Sources of Data" to the right.

Roads

—	Interstate Highway
—	U.S. Highway
—	Washington State Highway
—	U.S. Forest Service Road

Communities

SEATTLE	More than 250,000 people
SPOKANE	80,000 – 250,000 people
Port Angeles	15,000 – 79,999 people
Yakima	Fewer than 15,000 people or unincorporated
Bellingham	County Seat (underlined)
★ Olympia	State Capital
