

October, 2013

Readme for:
DGGS_Map_Symbolization.style

This ESRI style file was derived from the FGDC Digital Cartographic Standard for Geologic Map Symbolization (http://ngmdb.usgs.gov/fgdc_gds/), according to methods outlined in a recent presentation (http://ngmdb.usgs.gov/Info/dmt/docs/DMT13_Gallagher2.pdf).

This style was developed for use by the Alaska Division of Geological & Geophysical Surveys (DGGS), and is current as of October, 2013. The style file is continually updated when new symbols or representations are made. In the future, if you would like the most current version, please let me know.
