

# DIGITAL MAPPING TECHNIQUES 2021

The following was presented at DMT'21  
(June 7 - 10, 2021 - A Virtual Event)

The contents of this document are provisional

See Presentations and Proceedings  
from the DMT Meetings (1997-2021)

# **GEMS-IN-EXCEL**

**as Delivery Mechanism**

**Jordan T. Hastings**  
**UC Santa Barbara**

**Carlos Gutierrez**  
**California**  
**Geological Survey**

USGS Grant G20AC00014

**Undoubtedly, Excel is everyone's go-to software for tabular data entry, manipulation, analysis and visualization. Excel is also a developer's dream: it is fast, portable, stable, and extensible, with APIs attuned to the user interface that the world already knows.**

**For over a decade, I have been programming scientific data management in Excel. Through the NCGMP-funded coop at UC Santa Barbara, I am now exploring how to leverage Excel for geologic maps, GeMS specifically. In my DMT21 talks, I show how Excel can be utilized to:**

- 1) deliver our geologic maps to end-users, many of whom lack or eschew GIS software; and**
- 2) facilitate end-users' own work with our geologic maps, in field engineering, resource studies, survey, etc.**

# FOREGROUND

Try something new

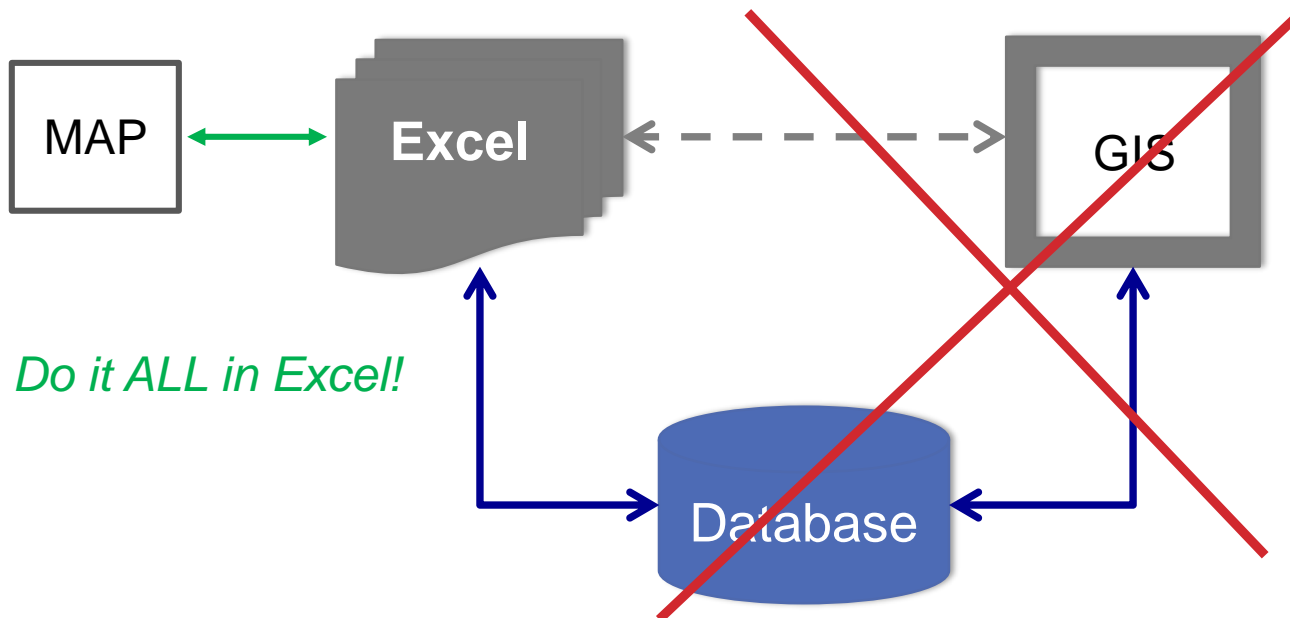

Same old

# FOREGROUND

Try something *really* new

Same old

# FOREGROUND

Simplify, simplify

Different focus – the map-user

# **OUTLINE**

## **Tahoe-Donner Map**

### **Excel Out-of-the-Box**

- **Tabular connections**
- **Mapping capabilities**

### **Google My Maps (not Earth)**

### **Preparations in ArcGIS**

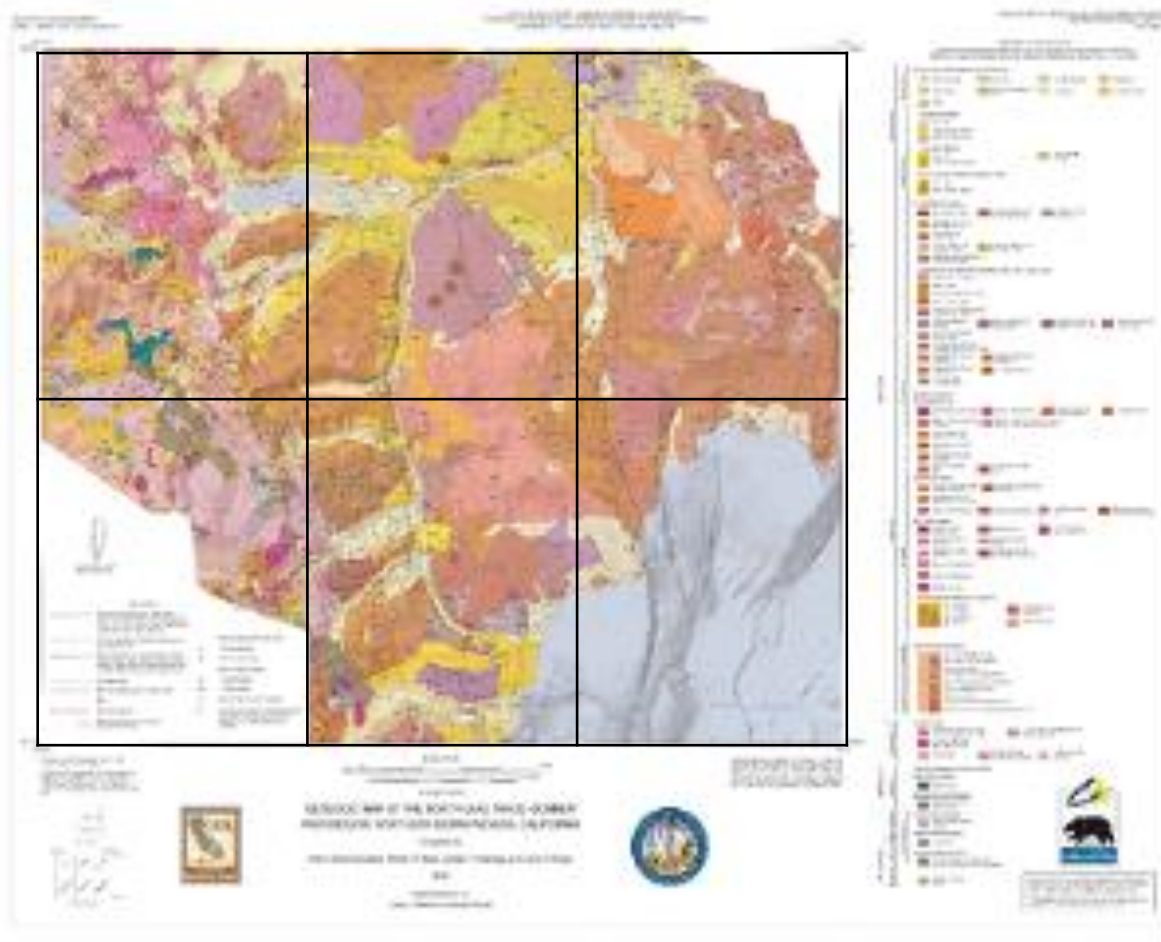

### **GeMS Delivery to End-User**

- **Excel tables, thumbnail map**
- **Google Map, spatial data**

# TAHOE-DONNER MAP

Sylvester, A.G. & al. (2012)  
a cast of hundreds

Compilation map  
Six Quads:

Top row (l-to r):  
Norden, Truckee,  
and Martis Peak

Bottom: Granite  
Chief, Tahoe City,  
and Kings Beach

# TAHOE-DONNER MAP

Kings Beach Quad

Simplify,  
simplify

Relatively  
**simple geology**

- Surficial and Igneous units
- Fault structure “in your face” still active and well studied -- even in the lake
- Intra-unit contacts (from lava flows)
- Fine cartography

# EXCEL OUT-OF-THE-BOX

	A	B
1	<b>Name</b>	<b>Pop(000)</b>
2	California	40,000
3	Nevada	3,500

# EXCEL OUT-OF-THE-BOX

	A	B	C
1	County	State	Pop(000)
2	Placer	CA	150
3	El Dorado	CA	250
4	Washoe	NV	400
5	Carson City	NV	75
6	Douglas	NV	50

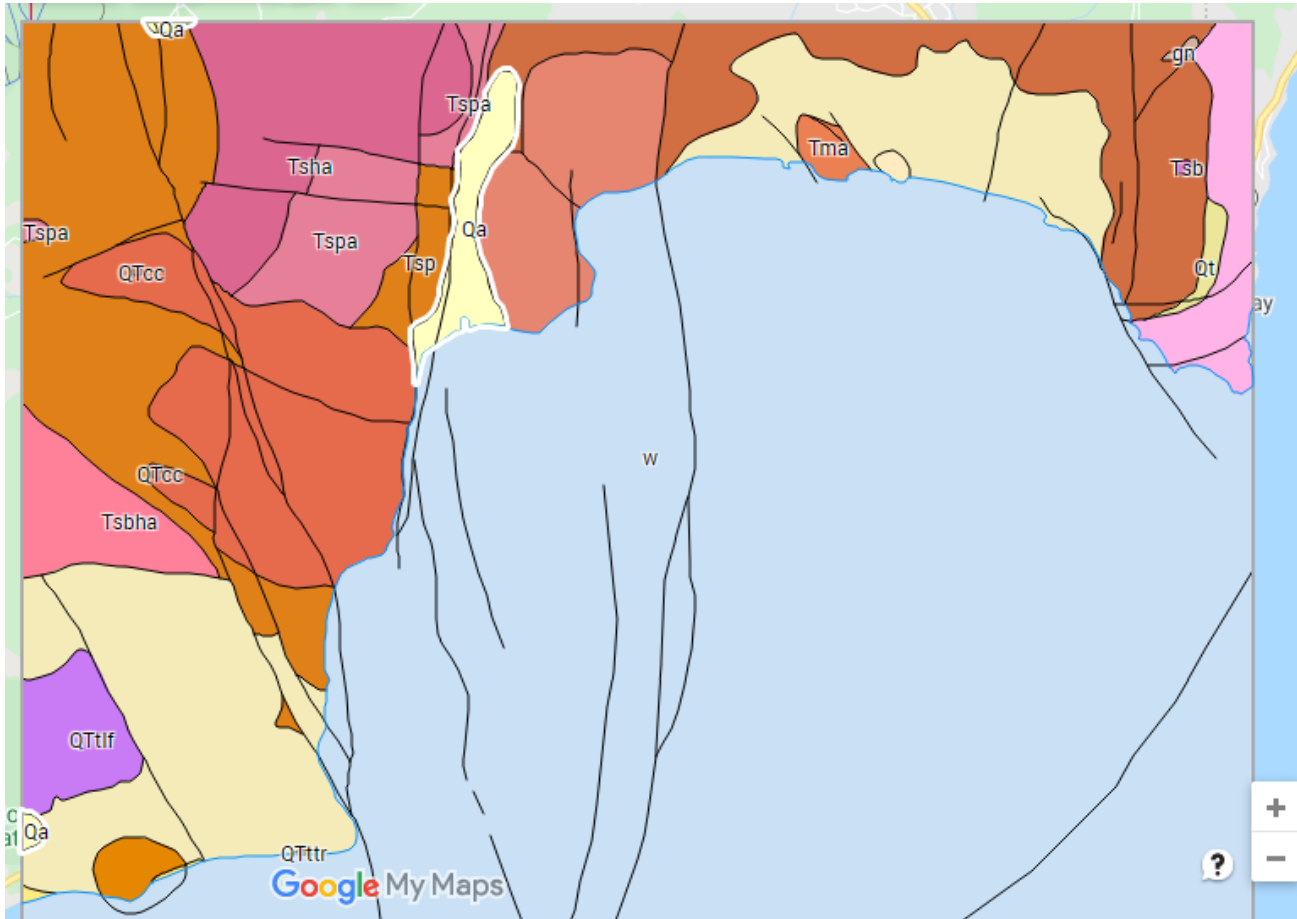

# EXCEL OUT-OF-THE-BOX

2		1 w	certain	w		DAS0005	
3		2 w	certain	w		DAS0005	
4		3 w	certain	w		DAS0005	
5		4 w	certain	w		DAS0005	
6		5 QI	certain	QI		DAS0005	
7		6 w	certain	w		DAS0005	
8		7 QI	certain	QI		DAS0005	
9		8 QI	certain	QI		DAS0005	
10		9 QTtr	certain	QTtr		DAS0005	
11		10 QTtr	certain	QTtr		DAS0005	
12		11 Qa	certain	Qa		DAS0005	

# GOOGLE MY MAPS

# **PREPARATIONS in ArcGIS**

**Started with clip of Kings Beach quad**

- 1. Re-projected from NAD27 UTM to Mercator**
- 2. Made a Personal Geodatabase (for now)**
- 3. Merged MUPs → MUP2 on unit label**
- 4. Exported MUP2 as shapefile**
- 5. Merged CAFs on upper 2-digit symbol (“LType”)**
- 6. Converted MUP2 and CAF2 to .kmz**

# **GEMS DELIVERY**

## **in Google My Maps**

- 1. Import MUP2 and CAF2 – spatial data (as .kmz)**
- 2. Create a shared Web link**

## **in Excel**

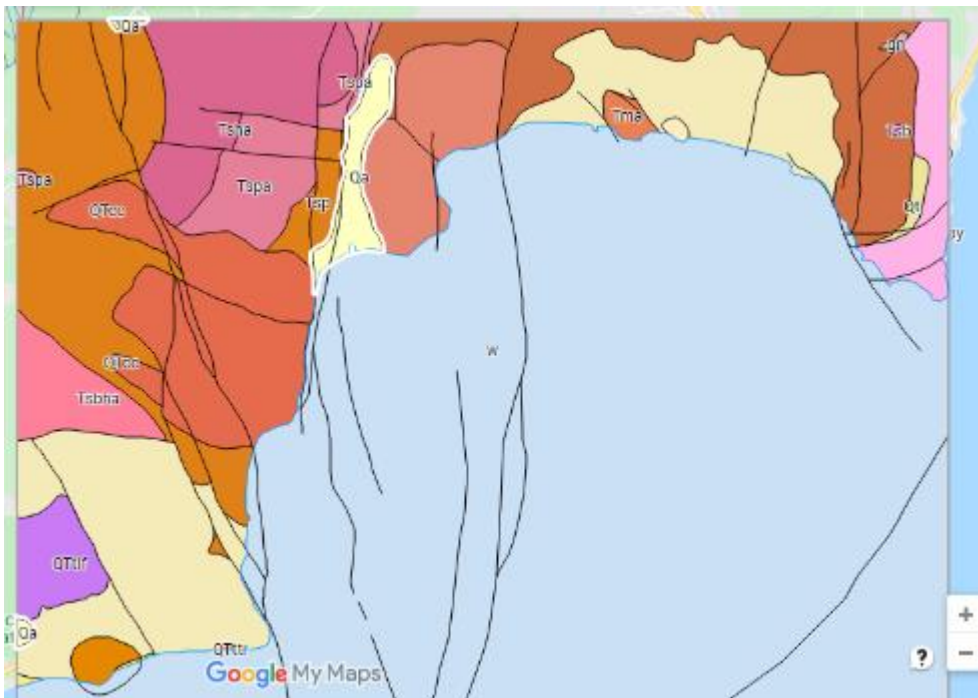

- 1. Query MUP, MUP2, CAF – tabular data (as .xlxs)**
- 2. Open 3D Maps, use MUP2 shapefile to define regions**
- 3. Use MUP2 worksheet to create thumbnail**
- 4. Link 3D Map to Google MyMap**

# GEMS DELIVERY

# **GEEMS DELIVERY in Excel & Google**

## **Features & Benefits**

### **A. Tabular data easily accessible in Excel**

- 1. Look-see outside any GIS**
- 2. Queryable and exportable**

### **B. Spatial data available, usable multiple ways**

- 1. Summary as .kmz (widely importable)**
- 2. Full detail as .mdb (GIS importable, single file)**
- 3. Shapefiles & .gdb (GeMS spec)**

# SUMMARY

## Advantage Excel, infact

### 1. Known and loved

### 2. Technically proficient

- ✓ Portable
- ✓ Powerful
- ✓ Programmable
- ✓ Already installed

### 3. Operationally efficient

- ✓ Stable
- ✓ Permanent

**THANKS!**
