

**INTRODUCTION**  
This colour bathymetric map shows the Scotian Shelf off the eastern coast of the Gulf of St. Lawrence, Canada. The map is based on data collected by the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR).

**MULTIBEAM BATHYMETRIC DATA COLLECTION**  
The data for this map were collected by the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR).

**DATA DISPLAY**  
The data for this map were collected by the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR).

**MORPHOLOGY**  
The Scotian Shelf is a wide, shallow continental shelf that extends from the coast of the Gulf of St. Lawrence to the west. It is characterized by a series of parallel ridges and valleys, with the most prominent feature being the Scotian Shelf Gully.

**ACKNOWLEDGMENTS**  
The authors would like to thank the Canadian Geospatial Information Repository (CGIR) and the Canadian Geospatial Information Repository (CGIR) for providing the data used in this map.
